

Basin Broadband DefenderMX Control

Panel

First, goto smtp.basinbroadband.com, then login with your FULL email address and password.

There are two main parts- one is preferences, where we can 'whitelist' email addresses that shouldn't be considered SPAM. The second is 'mailwatch' where we can release Quarantined messages.

Mailwatch - To Release Quarantined messages

To add to the whitelist, enter the sender's email address, then click Add.. It should then appear on the pull down menu above...

Also, you can change the level of checking. By default, it is "I want low Spam" Click Save if you make a change.
